

# NetClock® GPS Command Center Package

## GP951-NG911 – Single Network

- NetClock Model 9483 with OCXO Oscillator
- 6 Digit IP (PoE) Display Clock with PoE Injector Supply
- GPS Outdoor Antenna Model 8230
- GPS Antenna Surge Protector Model 8226
- Outdoor GPS Antenna Cable, 100 ft.

The NetClock GPS Command Center Package provides a complete solution for time synchronization. It includes all the necessary interfaces found in most PSAP applications to provide legally traceable time throughout a center.

The NetClock 9483 includes an integrated OCXO Premium Oscillator for GPS Backup. If the signal acquisition from the GPS satellites is disrupted by loss of antenna due to lightning, wind, or ice storm damage, if the antenna cable integrity is compromised, or if GPS itself is turned off for any reason, the OCXO will maintain seamless time synchronization for 30 days. Additional interfaces may be necessary for your specific system. Contact Orolia's Sales department for assistance.
