

## **SPECTRACOM PRODUCT DISCONTINUANCE NOTICE**

**Product:** SecureSync PTP Module Model 1204-12

**Effectivity Date:** May 27, 2016

**Replacement Product:** SecureSync PTP Module Model 1204-32 and other options

The PTP Module Model 1204-12 for the SecureSync platform is end-of-life. The capabilities of this product include:

- 10/100bT Ethernet port
- PTP v2 Master and slave capability
- Multicast and Unicast capability
- Default PTP profile

The product has been replaced primarily by the Model 1204-32 module that offers much higher PTP performance (processing capacity, speed, time transfer accuracy), but only with Master capability. Several other options are available as well.

Support for the PTP Module Model 1204-12 is expected to be available until 2021. However, no updates to software or firmware versions will be made. Product support will include technical assistance for installation, documentation, and repair or replacement with functionally equivalent units.

### **More Information**

Should you need any additional information about PTP capability in the SecureSync platform please do not hesitate to contact your Spectracom point of contact.
