2200/2240 Path Align-R™
Test Set for Microwave Antenna Alignment

- Battery-powered antenna alignment tranceiver test set (pair)
- Continuous voice communication with included headsets
- Tuneable operating bands:
  1.5 to 19.4 GHz (2200) or
  1.5 to 23.5 GHz (2240/2241)
- Available with Record-R™ GPS Data Logging (model 2241)
- Tone ranging provides variable pitch indication of path loss
- Path loss displayed in dB, updated every 300 ms

The Path Align-R™ test set is a high performance, complete test solution designed to quickly and accurately optimize the transmission path between two microwave antenna sites. The Path Align-R directly drives the site’s antennas, allowing the optimization process to be done without the need for on-site radios, complex test equipment, ground technicians, on-site AC power, cell phones, or two-way radios.

Antenna Alignment Test Set
Each Path Align-R is a tuneable, synthesized signal source and a narrow-band receiver. The transmitter’s fixed output level (0 dBm) is powerful enough for long path lengths, yet low enough to virtually eliminate the possibility of interference to adjacent links. The receiver’s sensitivity and narrow bandwidth allow for accurate measurement of the received signal while providing a very high rejection of adjacent signals. Front panel thumbwheel switches provide tuning within the frequency bands to a resolution of 1 MHz. Both test sets transmit to and receive from one another continuously.

Four Frequency Bands Available
The Path Align-R Model 2200 comes ready to use with four frequency bands. The 2400 extends the ranges of these bands. Models ending in “A” (e.g. 2200A, 2240A, etc.) are custom configured for at least one or more frequency band options. Each test set of two is delivered in custom designed, weather-resistant instrument backpacks that include pockets for carrying the headset, cable, waveguide-to-coax adapters, and a spare battery. The backpack also contains a large “D” ring to facilitate attaching the test set to the tower using a carabiner and nylon runner, sling or lanyard.

Record-R™ Internal Data Logging (Model 2241)
The results of the antenna path alignment are logged into the internally installed Record-R. The Record-R contains an embedded GPS receiver, which provides accurate date/time and position information to be added to the frequency and path loss data. This logged data is saved in non-volatile memory for later transfer to a PC. A single front panel pushbutton activates the logging process. Up to 250 separate data records can be saved in the field for later download. Access to stored records is provided via USB or RS-232 connectors located on the rear panel. The Log View-R™ software utility is provided for interface between a PC and the instrument.
### Technical Specifications: Path Align-R

#### Transmitter
- **Transmission:** Full-duplex (simultaneous transmission and reception)

#### Transmitter Output Power:
- 0 dBm, nominal

#### Transmitter Stability:
- 5.1 x 10^(-9) day (aging) + 1 x 10^(-6) (temperature 0°C to 50°C)

#### Tuneable Frequency Bands

<table>

#### Extended Bands
- 2240/2240A/2241/2241A

| **Band 1**       | 1.5-2.5 GHz|               |
| **Band 2**       | 3.5-5.0 & 5.8-6.6 GHz|           |
| **Band 3**       | 7.5-10 & 11.0-12.0 GHz|           |
| **Band 4**       | 15 & 18.1-19.4 & 22.0-23.5 GHz|         |

#### Record-R™
- (Models 2241/2241A)

- **Data Recorded:** Each record contains: model no., serial no., date, time (UTC), longitude, latitude, frequency, and path loss

#### Max. Number of Records:
- 250 stored in memory

#### Data Record Time:
- 20 ms nominal

#### Band Options for Models

| **Opt 01**       | 2200 & 2200A |                     |
| **Opt 02**       | 2240(A) & 2241(A) |               |
| **Opt 03**       | 2240(A) & 2241(A) |       |
| **Opt 04**       | 2240(A) & 2241(A) |         |

#### Storage Temperature:
- -40°C to 71°C (-40°F to 160°F)

#### Relative Humidity:
- 95% ± 5% at 30°C; 75% ± 5% at 40°C; 45% ± 5% at 40°C

#### Burn In:
- Failure-free burn in of no less than 100 hours at 40°C

#### Pollution Degree:
- 1 (no pollution) [EN 61010-1/3.7]

#### Transient Overvoltage:
- Each Path Align-R set of two comes with:
  - Headset (mic and earpiece) with 10 ft cord
  - Coax cable assembly (SMA(m) to SMA(m), 3 meters)
  - Battery (12 VDC/2.3 Ah rechargeable sealed lead-acid battery)
  - Battery charger (AC MAINS powered 90-264 VAC/47-63 Hz with IEC-320 input)
  - AC MAINS Power Cord (IEC-320 to NEMA type 5-15p plug)
  - Weather-resistant instrument backpack
  - Operating manual and user card

#### Mechanical Data
- **Weight:** Less than 3.2 kg (7 lbs) incl. instrument backpack and battery

#### Dimensions:
- 89 mm x 213 mm x 333 mm (3.5 inches x 8.375 inches x 13.1 inches)

#### Accessories
- Spectracom offers various optional accessories, such as waveguide adaptors, cables, carrying cases, spare batteries and more. See our Path Align-R Accessories data sheet for more information.
